Wreck on the Pan Handle.

CINCINNATI, Oct. 2.—The locomotive of a Pan Handle passenger train, due here last evening, struck a sycamore tree, fifteen inches in diameter, which had been blown across the track by a storm, a short distance northeast of Loveland. The train was running at the rate of thirty-five miles an hour. The locomotive broke the tree in two and threw it off the track. The front truck of the engine was thrown of the track, the pilot, smoke stack and cars were demolished. The engineer was knocked senseless with serious injuries to his head, and the fireman was badly injured. The engine, without a man to guide it, ran half a mile with trucks off the track, when the conductor turned on the air brakes. The train was delayed four hours.

Peculiar Lawsuit Decided.

GREENSBURG, Ind., Oct. 2.—A peculiar suit was decided by a jury, after two days' trial. Last May Samuel H. Logan agreed to give Will Winchester $150 for "shooting" a gas well with "rucka-rock." Winchester placed 100 quarts of the explosive in the well, and made two or three attempts to explode it.

Afterward Logan directed the drillers to remove the material put down. In doing this an explosion occurred, which left a string of tools in the well, completely closed up the aperture, and stopped the flow of gas. Logan sued for $1,500 damages; Winchester asked a judgment for the $150 he was to receive for the work. The jury gave Logan one cent damages.

JUDGE THURMAN.

The judge has for a long time had in mind what he would say in case he should write a letter, but his time has been so fully occupied, that it has been impossible for him to put it on paper. Ed. H. Blackburn Finds Himself in Serious Trouble.

Ed. H. Blackburn, a cigar maker, has been employed in the city for some time. He has been on a spree for a day or two, and this morning settled his chances for a trip to Michigan City.

He went to his boarding house on Harrison street, near the Robinson, and stole from his fellow lodgers three dress coats, an overcoat, three pairs of pants, a pair of ladies' shoes, and had with him a watch, inscribed on which was the name "Hoffman."

He then went to J. A. Baker's cigar factory on Columbia street, and stole 400 cigars from his employers.

The police were notified, and Marshal Meyer promptly caught the rascal at Ryan's saloon, on Columbia street, where he exchanged one hundred cigars for some whisky and $1.00 in cash.

He was locked up, and will have a hearing to-morrow.

Mrs. Dan Souder is very ill with typhoid fever.

Judge Chapin to-day divorced Ella Hall from Ernst Hall. He also summoned the superior court jury to report next Monday.

MONROEVILLE GOSSIP.

The News From That Lively Little Village Given in Detail.

C. A. Nill has started a shoe store in J. W. Smith's new building.

Seventy-seven carriages were in line at the funeral cortege of Miss Ida Krick last Sunday.

Sickness is prevailing to an unusual extent and our physicians are kept busy night and day.

The Misses Gertie and Loa Rower, of Calianda, Wis., are visiting friends here and at Decatur.

The Monroeville band furnished the music for the Sunday school picnic held at Williamsport last Saturday.

A number of our citizens were at Decatur last Friday, attending Wallace's circus. They pronounce it a circus worth attending.

Albert Miller, who worked with the Pittsburg bridge carpenters, will remove his family here from Fort Wayne. Mr. Miller will teach school this winter.

Mr. B. M. Cobb, of Indianapolis, spoke to half a dozen republicans at the wigwam last Wednesday evening. Next time they expect to have a big, broad time.

William Franke, the popular trustee of Madison township, has been appointed by the county commissioners to superintend the construction of an iron bridge, west of here, along the Pittsburg road.

We are awaiting an answer to our last from our friend, "Monroeville," who promised his republican friends here to return and "be with us." However, he has failed to make an appearance and our friends are glorying in our pluck.

Mr. F. O. Savico has resigned his position as clerk in the store of D. S. Redelsheimer. Mr. Savico has been clerking for a number of years and is known to be a pleasant, accommodating and cordial salesman. He may engage in other business here.

The schools in Monroe township begin October 25. The Monroeville school is in full blast, having an enrollment of 225 pupils, who are in charge of Superintendent Munger and an able corps of teachers. The schools in Madison township began last Monday.

Over a year ago the town trustees condemned a side walk in front of a lot owned by C. W. Rollins, who failed to comply with their wishes by placing a new walk. It was advertised and sold to D. C. Purman, who built the walk. Since then a number of law suits were instituted and decided in favor of the town. The town took a lien on the lot and it was last week sold at sheriff's sale to the town of Monroeville on consideration of $75, the exact cost of the walk and the cost of the sale.

The building committee of the new Catholic church has cancelled the contract given to Funk & Co., of Payne, Ohio, and have given it to Michael Baltes, of Fort Wayne. The reason of this step is because Funk and his men were frequently on drunken sprees, thus delaying the construction of the new edifice. Baltes has now a force of men at work on the tower and by the latter part of this week the brick work will be completed. Welch, the slater, is already at work. On account of not having the building finished the fair has been postponed until November 12.

A right royal reception was tendered Supt. P. S. O'Rourke by his democratic friends at Hoagland last Wednesday. An elegant hickory pole 130 feet long was raised in the afternoon and in the evening Mr. O'Rourke addressed one of the finest and largest crowds that ever greeted a political orator at that place. Mr. O'Rourke is a fine speaker and a good exponent of the tariff, being, no doubt, one of the wisest political orators on this question. His address lacked the usual slurs and jokes of many speakers, but was throughout one of the most sensible and reasonable speeches to which the Hoagland people have had the honor of listening to. Efforts will be made to have Mr. O'Rourke address the citizens of this place before the campaign is over.

Miss Ida Krick died at the residence of her mother, in Madison township, last Friday morning, at the age of seventeen years, after a painful illness of eight days. Her funeral, which was the largest held here for many years, took place Sunday at 10 o'clock, from the M. E. church, conducted by Rev. D. S. Miller. Her body rests in the new I. O. O. F. cemetery. Miss Krick was a bright and intelligent young lady and her loss will be keenly felt by her many friends. The bereaved family have the sympathy of the community. The pall bearers were: Misses Lizzie Marquardt, Gertie Bauserman, Mary Favery, Lucinda Cagnet, Anna Marquardt and Anna Guyer. The funeral was in charge of Undertaker Strass.

CONFESSED HER GUILT.

A Thirteen-Year-Old Girl Puts Poison in Food to Kill Her Mother, Brother and Sister.

CHICAGO, Oct. 2.—Minnie Dratzerberg, the thirteen-year-old girl who attempted to kill her mother, brothers and sister by putting poison on food, was arraigned in the police court this morning. She confessed her guilt in a nonchalant manner.

TIRED OF LIFE.

Jacob Kafer, an Old Bachelor, Hangs Himself in a Stable—Whiskey Did It.

Mr. P. Jones has a farm out on the Catholic cemetery road, and employs Frank Swift to assist him on the place. This morning Mr. Swift made a discovery that sent the shivers chasing each other up and down his spinal column.

He arose shortly before 6 o'clock, and, as is his custom, arranged to feed the horses at once. He proceeded to a big stack of corn-fodder and grasping an armful of it, he went to the stable. The corn stalks were so bushy that Mr. Swift could not push them through the door ahead of him so he turned about and backing in through the unlatched door, sought to pull the fodder in after him. Just inside the door Mr. Swift collided with something. His back was towards the obtruding body and he couldn't see it. He moved further in and swung the dead body of a man to a side.

The horror-stricken fellow dropped everything and rushed from the stable. Through the open door, however, he could see Jacob Kafer suspended from the rafters of the hay loft.

The body was speedily cut down, and as it was still warm, life could not have been extinct more than an hour or two.

Some time during the night Kafer went up into the hay loft, fastened a hitching strap about his neck, attached the other end to a cross beam and then letting himself down through the loose floor he strangled to death.

Kafer had no home but did odd jobs for farmers out there off and on for ten years past. He was a bachelor and drank to excess. He received some money from a brother in Germany some time and after spending it took his life to end the agony.

He has no relatives in this country and will have to be buried by the county.

Coroner Stellhorn held an inquest today and found the facts as above related.

The Reason Why

Ayer's Pills are so popular is, that while always reliable as a cathartic medicine, they never leave any ill effects. This is because they are purely vegetable, and entirely free from calomel or any other dangerous drug. In all cases, therefore, whether the patient be old or young, they may be confidently administered.

In the Southern and Western States, where derangements of the liver are so general, Ayer's Pills have proved an inestimable blessing. D. W. Baine, New Berne, N. C., writes:

"I suffered a long time with stomach and liver troubles. I tried various remedies, but received no benefit until I commenced taking Ayer's Pills. These pills benefited me at once. I took them regularly for a few months, and my health was completely restored."

Throughout New England, next to lung diseases, Stomach and Bowel Complaints are the most prevalent.

Dyspepsia

and Constipation are almost universal. Mr. Gallacher, a practical chemist, of Roxbury, Mass., who was long troubled with Dyspepsia, writes:

"A friend induced me to try Ayer's Pills, and, after taking one box without much benefit, I was disposed to quit them; but he urged perseverance, and, before I had finished the second box, I began to experience relief. I continued taking them, at intervals, until I had used eleven boxes. Suffice it to say, that I am now a well man, and grateful to your chemistry, which outstrips mine."

The head and stomach are always in sympathy; hence the cause of most of those distressing headaches, to which so many, especially women, are subject. Mrs. Harriet A. Marble, of Poughkeepsie, N. Y., writes that for years she was a martyr to headache, and never found anything to give her more than temporary relief, until she began taking Ayer's Pills, since which she has been in the enjoyment of perfect health.

It is said that 10,000 school houses have been built in Indiana, during the past twenty years.

Hon. David Turpie spoke to an audience of 6,000 people at Laporte last Saturday. The junior senator is receiving an ovation everywhere.

The New York newspapers are discussing the mayoralty, and Mr. Hewitt, the present chief magistrate, seems to have the best of the sentiment.

The theft of $100,000 worth of diamonds, at Paris, from Mrs. Parson Stevens, of New York, was not an advertisement. The thief got away with the property.

It is asserted boldly that certain gambling houses and dens of iniquity are operated under police protection. The evidence of a disgraceful deal is coming to the surface.

Mr. Richard Smith, of the Cincinnati *Commercial-Gazette*, has purchased the Toledo *Commercial*. Mr. Smith says he will make the paper first-class in every particular, publishing the full Associated Press report.

Governor Palmer is making a magnificent canvass of Illinois, but his success is hampered by the contest for control of the legislature, by ex-Congressman Morrison, who appears to be making a personal campaign.

A dozen citizens of Bloomington, Ill., testify that General Harrison did insult the Irish people in a speech at that city and now come a number of citizens who assert that he did not. The case now goes to the people for their consideration.

The New York *Herald* quotes this from the republican national platform of 1884: "The republican party pledges itself to correct the inequalities of the tariff and to reduce the surplus * * by such methods as will relieve the taxpayer without injuring the laborer, or the great productive interests of the country." But that is not half so good as the fourth plank from the republican national platform of 1868, adopted at the convention which first nominated General Grant to the presidency: "It is due to the labor of the nation that taxation should be equalized and reduced as rapidly as the national faith will permit." This states the democratic platform exactly.

The present session of congress is the longest in American history. The longest preceding session was that of 1850, the year of the Missouri compromise, which was adjourned at noon of September 30. Constructively, the session of 1868, following the impeachment proceedings against President Johnson, was longer, the adjournment sine die having taken place November 10, but as a matter of fact, congress took a six weeks' recess from July 27, and never afterward had a quorum or attempted to transact any business. The house of representatives has not had a quorum for several weeks, but such business as could be done by unanimous consent has been done, and, as one of the regular annual appropriation bills—the general deficiency—is still before the conferees of the two houses, it cannot yet be said that the year's regular work for either house is finished.

Paper is now manufactured from sea weed, according to a process recently invented in Japan. The article made in this way is said to be so strong as to be almost untearable, is sufficiently transparent to admit of its being used as window glass, and takes all colors about equally well.

WHAT THE MILLS BILL MEANS.

1. It means Cheaper Clothing. The Mills' bill takes the tax or duty off from wool, thus reducing the cost of woolen goods and enabling the workingman to buy for the same price he pays to-day clothing that will contain less shoddy and more wool.

2. It means Cheaper Food. The workingman now pays a heavy tax on every pound of salt or sugar that he uses. The Mills bill takes the duty off from salt entirely, and reduces that on sugar.

3. It means Cheaper Houses. The home of every mechanic in the land costs far more than it ought to, owing to the taxes on the materials used in its construction, levied for the sole benefit of the forest owners of Michigan and Maine and the mine owners of the western and middle states. The Mills' bill puts lumber, brick and building stone on the free list, and reduces the tax on iron, copper, lead, zinc, paint, slate, tools and other articles used in building.

4. It means Less Rent to Pay. The less the cost of building, the more houses will be built and in the market.

5. It thus means More Employment for the multitude of people engaged in or dependant on the building trades.

6. It means More Employment for those engaged in woolen manufactures. The manufacturer gets his material cheaper, can thus sell his manufactured goods cheaper without cutting wages, finds a wider market, and will thus extend his plant and business.

7. It does not mean Free Trade, but lower duties on the raw materials or manufacture and the necessaries of life.

8. It means, in short, that the democratic party has to-day, as ever, the interests of the laboring classes nearest to its heart, and is now advocating in the Mills bill a measure that will necessarily increase the welfare and prosperity of the laboring people of this country.

Dyspepsia

Makes the lives of many people miserable, and often leads to self destruction. We know of no remedy for dyspepsia more successful than Hood's Sarsaparilla. It acts gently, yet surely and efficiently, tones the stomach and other organs, removes the faint feeling, creates a good appetite, cures headache, and refreshes the burdened mind. Give Hood's Sarsaparilla a fair trial. It will do you good.

In 1810 Henry Mogel, a farmer of Center Township, Berks County, Pennsylvania, found a land turtle in one of his fields, and cut his name and the year on the under part of its shell. His son, the present Treasurer of Berks County, lives on the same farm. A few days ago he was passing through the field and he found the turtle, with the name and date plain on the shell, within a few feet of the spot where the turtle was first found, seventy-eight years ago.

It is harmless and can be used with perfect safety by any one. It is superior to all other remedies. There is positively nothing else like it.

The Snake-Charmer's Lost Charm.

India has just lost a snake-charmer, one Kondajee Mubojee, who fell a martyr to his belief in his own powers, says the London *Standard*. A lad 6 years old, named Vittoo Heorree, was bitten by a cobra at Mazagon, Bombay, and, as usual, a snake-charmer was at once sent for. Kondajee arrived at the spot in half an hour, but the boy was already dead. The snake-charmer inquired where the cobra had taken refuge, and, on a woodpile being pointed out, he removed the wood, found and seized the snake, and endeavored to make it bite the boy, declaring if it did so the child would at once be restored to life. For two hours he persevered, but the snake refused to strike the boy, and at last, irritated beyond endurance, turned and bit Kondajee in the hand.

The snake-charmer calmly placed the snake in a copper vessel and then sat down. A vehicle was sent for and the man placed inside, but by the time he reached home he was dead. The story testifies strongly to the belief of snake-charmers of India in their power over the snakes, and to the existence of a superstition that the second bite of a snake will restore the life that the first has taken away. The apathy of the Hindoo is evident by the fact that the snake-charmer used no effort whatever to save his own life. Whether he thought that he was proof against its ill-effects was not stated in the evidence given at the inquest held on the body of the child; but it is clear that he had no belief in the virtues of any antidote or mode of treatment.

It is most probable that he was confident in the powers of the drugs, ointments, or charms he had previously used to protect him, for the evidence of the spectators showed that upon finding the snake in the woodpile he had seized it without the slightest hesitation. It is certainly singular that a man accustomed to handle snakes should have been so convinced that their bite had power to restore life as well as to cause death.

Has Great Confidence in the French Count.

"An' phwere is Mary Ann now, Mrs. O'Raherty? I haven't seen her for siveral days."

"Faith an' she's gone to the waterin' place, Mrs. O'Flaherty."

"An' phwere is that?"

"Divil the bit do I know, but it's somewhere in the Aist."

"An' who did she go wid?"

"The Frinch Count, av coorse."

"Wid the Frinch Count! 'Pon me sowl, Mrs. O'Raherty, is it sindin' your only daughter to the divil that you do be allowin' her to travel through the country wid a mon widout bein' married?"

"Faith an' it's little ye know of the shtoyle of hoigh society, Mrs. O'Flaherty, or ye wouldn't be spakin' so ignorant. There isn't a more dacenter girrul in the wurruld than Mary Ann, an' the Frinch Count towld me he would watch over her loike a father, so he would."

"An' ye belave him?"

"To be sure I belave him. Mary Ann to him is the wurruld itsilf; an' does ye think that under sich sarcumstance he'd do anything wrong to her? He looks on Mary Ann as his own. He towld me so hisself, he did. An' look at the great ixpins he do be goin' to for her sake—drissin' her loike a quane an' givin' her all the money she can carry an' faistin' her on the best in the land. Does ye think he'd be doin' all that if he didn't look on her as his woife?"

"I don't dispute, Mrs. O'Raherty, that he looks upon her as his woife, an' that's phwat's the matter wid Mary Ann. Phwin I was young I had a illegant mon wance that looked upon me the same way, the dirty divil!"

"Well, good mornin', Mrs. O'Flaherty. It's two big washin's that I must be gittin' out to-day, an' if I niver begin I'll niver commince."—*Kentucky State Journal*

DR. R. J. GATLING, the inventor of that terrific engine of destruction known as the Gatling gun, has spent several years of study and experiment upon a new method of making heavy ordnance, and as a result has obtained patents in this country and Europe upon an invention which may revolutionize the entire system of manufacturing heavy missile projectiles now in vogue. The only plan on which these guns have ever been constructed is on the built-up method, which is the style of gun now turned out by Krupp, Armstrong and other manufacturers. Results obtained from these guns have always been unsatisfactory, the record being that nearly all of them burst sooner or later. The best gunmakers of Europe will not warrant their guns to fire more than 100 times One or two attempts have been made in this country to make solid steel guns by casting huge ingots of steel and boring them out. From a scientific standpoint there are serious objections to this method, the chances for imperfections largely predominating. Dr. Gatling's new invention is said to be the casting of the heaviest ordnance in solid steel around a central core, which is used in several ways for obviating the disadvantages of the old style guns. The result, it is claimed, will result in the production of an infinitely better gun at a reduction of 50 per cent. in cost. Operations are now under way to have two six-inch guns made for the purpose of demonstrating the practicability of Dr. Gatling's new system.

Caught.

By reason of his skillful manenvering and great adroitness, Mr. Billing had lived to the age of 49 without becoming a benedict, but in an unguarded moment the discipline of a lifetime availed him nothing.

It was on a May morning that he strolled into a garden with Miss Tenie McGinnis, a spinster of 48. They sat down on a garden bench, and Mr. Billings unwittingly said:

"See those robins building their nest in that old apple tree."

"Oh, Mr. Billings!" but Billings, seeming to have lapsed into idiocy, rambled on:

"Don't you like to see the little birds mate?"

"Oh, Mr. Billings; how you do talk!"

"Really, Miss McGinnis, I——"

"Oh, *Mr.* Billings!"

"Why, Miss——"

"Oh, Mr. *Billings!*"

"No, but, really, Miss McGinnis, I'm in earnest; I love to——"

"Oh, you *naughty* man! And did you bring me out here to say this to me? Oh, Mr. Billings!"

"Why, I only said that I loved——"

"Oh—oh—it's all so sudden. What shall I say? I—I—suppose you'll just *make* me say yes. I—I—oh, *George!*"

"Why, I—I——"

"*My*, George!"

"Why, woman, I——"

"I suppose I could be ready in a month if you really insist on it, dear George."

"See here, Miss——"

"Hush, darling, some one is coming."

And when their host and hostess appeared Miss McGinnis blushed and said with down-cast eyes:

"We're engaged."

And Billings hadn't the nerve to deny it—so they were married. — *Detroit Free Press.*

The liver and kidneys must be kept in good condition. Hood's Sarsaparilla is a great remedy for regulating these organs.

AMONG the exhibits at a Belgian dog show is a breed of dogs, the Schipperkes, found only in Belgium. They are made use of on board the numerous inland navigation boats. They are small black dogs, without tails and with pointed ears, of extraordinary intelligence and fidelity.

"I have taken, within the past year, several bottles of Ayer's Sarsaparilla, and find it admirably adapted to the needs of an impoverished system. I am convinced that this preparation, as a blood purifier, is unequaled." C. C. Dame, Pastor Congregational church, Andover, Me.

Advice to Mothers.—Mrs. Winslow's Soothing Syrup should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to take. It sooths the child, softens the gums, allays all pain, relieves wind, regulates the bowels and is the best known remedy for diarrhœa, whether arising from teething or other causes. Twenty-five cents a bottle.

mar-18-1y

Five cents each will be paid at this office for six copies of THE DAILY SENTINEL of April 3 and 17 and August 13, 1888. 19-tf

I have not used all of one bottle yet. I suffered from catarrh for twelve years, experiencing the nauseating dropping in the throat peculiar to that disease, and nose bleed almost daily. I tried various remedies without benefit until last April, when I saw Ely's Cream Balm advertised in the Boston *Budget*. I procured a bottle, and since the first day's use have had no more bleeding—the soreness is entirely gone.—*D. G. Davidsin, with the Boston Budget, formerly with Boston Journal.*

The Newspaper Revolution.

From the Rockford (Ill.) Register.

"The era of cumbrous blanket-sheets seems coming to an end, and newspapers like the *New York Sun* and THE CHICAGO DAILY NEWS are the prominent journalistic successes of the period. The papers that give enough reading matter to fill a good volume in each daily issue are going out of favor with many people who have some other employment for their time than the search through mountains of straw for kernels of news. The sheets that give the news systematically and amply, and without unnecessary padding, are taking the lead in the great cities."

Forty years ago the chief duty of an editor, in view of his limited facilities, was to gather all the news he could and print it. Intelligence was transmitted slowly; many occurrences of interest were never heard of beyond their immediate locality; ocean mails were long in transit, and the overthrow of an European dynasty was not known here until long after the event. Suddenly there came a change. The railroad and the telegraph superseded old methods, and the newspaper was literally flooded with news. The death of a petty ward politician in San Francisco, the result of a Presidential election, the accession of a sovereign, the outbreak of a war, and notice that a shanty had been burden in Texas, all were hurried over the wires into the newspaper offices, and there being no idea of discrimination, all were printed. Thus originated the "blanket sheet." The publisher who could send out the biggest blanket for a nickel was the most enterprising; the biggest paper was the best; it was a period of bigness. But after a time the very excess of the evil brought the remedy, and there began an era of discrimination, during which arose such journals as the *New York Sun* and THE CHICAGO DAILY NEWS. That the public appreciated the new departure is best evidenced in the fact that the *Sun* reached a circulation of 150,000 a day, and THE DAILY NEWS 175,000. The wonderful and constantly growing popularity of the condensed, low-priced papers has so far brought the cumbrous and high-priced blanket-sheets to their senses, that they have now somewhat reformed both as to size and price, but they are still too far removed from the true ideal of American journalism to meet the needs of the great majority.

In the west THE CHICAGO DAILY NEWS has been the first to appreciate and meet the situation, and it now enjoys the results of its twelve years of pioneer work in a daily circulation averaging over three times that of any of its contemporaries, and considerably more than the circulations of all other Chicago dailies combined. It is hardly necessary to say that such a circulation could not be attained, much less maintained, except by a paper of high grade of excellence, as well as one sold at a popular price. To win such recognition the cheap paper must be *as good a newspaper* as the best of its higher-priced competitors. And this THE DAILY NEWS certainly is. It is a member of the Associated Press, and is the only paper in Chicago which possesses a franchise which secures to it both the day and night dispatches of the Association. In the general field of news-gathering it represents in the highest degree the progressive enterprise of American journalism: as a *news*-paper it challenges comparison with any in the land. In its editorial columns THE DAILY NEWS speaks from the standpoint of the independent newspaper, and thereby escapes the temptation of impairing honest and honorable influence by condoning or defending the questionable under the pressure of party allegiance. It is not an organ, neither is it a neutral in questions of principle. It has the courage of its convictions. The organ of no party, sect or interest, it voices the united demand of all those better elements of society in behalf of purity, honesty and decency in all the relations of life. By just so much as it thus commends itself to the regard of the truly "best people" of the community does it voluntarily renounce any community of interest with all others.

So conspicious a success must have its imitators, and THE DAILY NEWS has the endorsement such imitation always bestows. However as it is the only one-cent paper in Chicago or the West which is a member of the Associated Press—all other Chicago Associated Press papers cost 3 cents—all imitation must continue, so far as *news giving* goes is concerned, to be but imitation. THE CHICAGO DAILY NEWS is "the original," "the best."

Sold by all newsdealers at ONE CENT per copy, six cents per week. Mailed, postage paid, for $3.00 per year, or 25 cents per month. Every farmer can now have his daily paper at little more than the cost of the old time weekly. Address

TWO FARMERS in Hunterdon County, New Jersey, who had been engaged in almost constans quarrels as to the merits of their live stock for several years, recently decided to settle disputes in a very strange way, says the New York *Clipper*. Their last controversy was as to which had the best ram. A New York lawyer who had frequently been asked to arbitrate their differences proposed that the rams be pitted one against the other, and the one that outbutted his rival should be considered the winner and its owner and his possessions be deemed the superior for a year to come. This was agreed to, together with a condition, proposed by one of the disputants, that each farmer should ride his ram during the fray. During the second round the men, as well as the sheep, commenced butting each other and kept up the strange contest until the spectators separated them to avoid serious consequences. One of the rams died from injuries received in the fight and the farmers were so used up that they did not venture from their homes for several days.

William McPhail, assistant master mechanic of the Nickel Plate shops at Stony Island, has resigned his position.

The blacksmith and repair shops of the Street railroad company will be removed to the eastern part of the city.

Cyrus Burget, of the Bass machine shops, who has been sick for some time, is out again, but has not yet returned to duty.

Mr. Anthony Corcoran, a brakeman on the Nickel Plate, had his wrist severely injured yesterday, while making a coupling.

Henry Hunting, of the Olds works, has a fine picture of all the state governors, and has it hung up in the shop clerk's office.

Chas. Welsh, a Pittsburg fireman who lives in this city, was injured Sunday night at Columbia City by falling from his locomotive.

John McCarthy, chief clerk in the Nickel Plate shops at Stony Island, returned home yesterday, after passing Sunday in the city.

The Pittsburg car shops employed eight new men this morning. All of them are the employes who were suspended a few months ago.

Mr. Ed. Crosby, a popular machinist at the Nickel Plate shops, was married three weeks ago and his friends did not find it out until yesterday when congratulations were heaped upon him thick and fast.

The Pittsburg machine shops will take back a number of their recently suspended men next week. The department expects to be kept busy during the balance of the year and night work will be a necessity.

There were built at the Indianapolis car works last month 532 cars. It is the largest number ever turned out in any one month at this establishment. In addition to this the company did a good deal of repairing.

The Pennsylvania company took over fifty persons from this city to Chicago this morning. The company is selling round trip tickets to Chicago for $4.20 every Tuesday until the 16th, on account of the exposition, and a large number are availing themselves of the low rates.

Within the next thirty days there will not be a manufactory of any importance in and about Indianapolis that is not supplied with natural gas for fuel unless it be a few establishments where the work is of such a character that the waste lumber and sawdust supply all the fuel required.

The boys at the Olds wheel works tell a dog story on Frank Connors, the engineer at engine house No. 2, which is hard, even for a reporter, to believe and we consequently refrain from repeating it, but will only say that Frank thought he had killed a dog, and was surprised some time afterward to see his dogship turn up alive and as well as ever.

The new form of passenger conductors' checks adopted by the Cincinnati, Wabash and Michigan railway is attracting much attention in railway circles. There are eight different designs for the top of the check, and each one is printed in three colors, making twenty-four different kinds, or a different check for every working day in the month. If needed, there could be over one hundred different designs in one or more colors.

He was crossing the track at the time in a covered carriage and failed to notice the approach of the train. His vehicle was demolished and the horse he was driving was also killed.

Montgomery Hamilton were appointed a committee to select speakers and besides Judge Thurman they will have such men as Speaker Carlisle, Congressman Mills, Ex-Senator Grady, of New York, Hon. John R. Wreck on the Pan Handle.

CINCINNATI, Oct. 2.—The locomotive of a Pan Handle passenger train, due here last evening, struck a sycamore tree, fifteen inches in diameter, which had been blown across the track by a storm, a short distance northeast of Loveland. The train was running at the rate of thirty-five miles an hour. The locomotive broke the tree in two and threw it off the track. The front truck of the engine was thrown of the track, the pilot, smoke stack and cars were demolished. The engineer was knocked senseless with serious injuries to his head, and the fireman was badly injured. The engine, without a man to guide it, ran half a mile with trucks off the track, when the conductor turned on the air brakes. The train was delayed four hours.

Peculiar Lawsuit Decided.

GREENSBURG, Ind., Oct. 2.—A peculiar suit was decided by a jury, after two days' trial. Last May Samuel H. Logan agreed to give Will Winchester $150 for "shooting" a gas well with "rackarock." Winchester placed 100 quarts of the explosive in the well, and made two or three attempts to explode it.

Afterward Logan directed the drillers to remove the material put down. In doing this an explosion occurred, which left a string of tools in the well, completely closed up the aperture, and stopped the flow of gas. Logan sued for $1,500 damages; Winchester asked a judgment for the $150 he was to receive for the work. The jury gave Logan one cent damages.

JUDGE THURMAN.

The judge has for a long time had in mind what he would say in case he should write a letter, but his time has been so fully occupied, that it has been impossible for him to put it on paper. Ed. H. Blackburn, a cigar maker, has been employed in the city for some time. He has been on a spree for a day or two, and this morning settled his chances for a trip to Michigan City.

He went to his boarding house on Harrison street, near the Robinson, and stole from his fellow lodgers three dress coats, an overcoat, three pairs of pants, a pair of ladies' shoes, and had with him a watch, inscribed on which was the name "Huffman."

He then went to J. A. Baker's cigar factory on Columbia street, and stole 400 cigars from his employers.

The police were notified, and Marshal Meyer promptly caught the rascal at Ryan's saloon, on Columbia street, where he exchanged one hundred cigars for some whisky and $1.00 in cash.

He was locked up, and will have a hearing to-morrow.

The News From That Lively Little Village Given in Detail.

Seventy-seven carriages were in line at the funeral cortege of Miss Ida Krick last Sunday.

Sickness is prevailing to an unusual extent and our physicians are kept busy night and day.

The Misses Gertie and Lea Rower, of Caliando, Wis., are visiting friends here and at Decatur.

The Monroeville band furnished the music for the Sunday school picnic held at Williamsport last Saturday.

A number of our citizens were at Decatur last Friday, attending Wallace's circus. They pronounce it a circus worth attending.

Albert Miller, who worked with the Pittsburg bridge carpenters, will remove his family here from Fort Wayne. Mr. Miller will teach school this winter.

Mr. B. M. Cobb, of Indianapolis, spoke to half a dozen republicans at the wigwam last Wednesday evening. Next time they expect to have a big, broad time.

William Franke, the popular trustee of Madison township, has been appointed by the county commissioners to superintend the construction of an iron bridge, west of here, along the Pittsburg road.

We are awaiting an answer to our last from our friend, "Monroeville," who promised his republican friends here to return and "be with us." However, he has failed to make an appearance and our friends are glorying in our pluck.

Mr. F. O. Savico has resigned his position as clerk in the store of D. S. Redelsheimer. Mr. Savico has been clerking for a number of years and is known to be a pleasant, accommodating and cordial salesman. He may engage in other business here.

The schools in Monroe township begin October 25. The Monroeville school is in full blast, having an enrollment of 225 pupils, who are in charge of Superintendent Munger and an able corps of teachers. The schools in Madison township began last Monday.

Over a year ago the town trustees condemned a side walk in front of a lot owned by C. W. Rollins, who failed to comply with their wishes by placing a new walk. It was advertised and sold to D. C. Purman, who built the walk. Since then a number of law suits were instituted and decided in favor of the town. The town took a lien on the lot and it was last week sold at sheriff's sale to the town of Monroeville on consideration of $75, the exact cost of the walk and the cost of the sale.

The building committee of the new Catholic church has cancelled the contract given to Funk & Co., of Payne, Ohio, and have given it to Michael Baltes, of Fort Wayne. The reason of this step is because Funk and his men were frequently on drunken sprees, thus delaying the construction of the new edifice. Baltes has now a force of men at work on the tower and by the latter part of this week the brick work will be completed. Welch, the slater, is already at work. On account of not having the building finished the fair has been postponed until November 12.

A right royal reception was tendered Supt. P. S. O'Rourke by his democratic friends at Hoagland last Wednesday. An elegant hickory pole 130 feet long was raised in the afternoon and in the evening Mr. O'Rourke addressed one of the finest and largest crowds that ever greeted a political orator at that place. Mr. O'Rourke is a fine speaker and a good exponent of the tariff, being, no doubt, one of the wisest political orators on this question. His address lacked the usual slurs and jokes of many speakers, but was throughout one of the most sensible and reasonable speeches to which the Hoagland people have had the honor of listening to. Efforts will be made to have Mr. O'Rourke address the citizens of this place before the campaign is over.

Miss Ida Krick died at the residence of her mother, in Madison township, last Friday morning, at the age of seventeen years, after a painful illness of eight days. Her funeral, which was the largest held here for many years, took place Sunday at 10 o'clock, from the M. E. church, conducted by Rev. D. S. Miller. Her body rests in the new I. O. O. F. cemetery. CONFESSED HER GUILT.

TIRED OF LIFE.

Jacob Kafer, an Old Bachelor, Hangs Himself in a Stable—Whiskey Did It.

Mr. P. Jones has a farm out on the Catholic cemetery road, and employs Frank Swift to assist him on the place. This morning Mr. Swift made a discovery that sent the shivers chasing each other up and down his spinal column.

He arose shortly before 6 o'clock, and, as is his custom, arranged to feed the horses at once. He proceeded to a big stack of corn-fodder and grasping an armful of it, he went to the stable. The corn stalks were so bushy that Mr. Swift could not push them through the door ahead of him so he turned about and backing in through the unlatched door, sought to pull the fodder in after him. Just inside the door Mr. Swift collided with something. His back was towards the obtruding body and he couldn't see it. He moved further in and swung the dead body of a man to a side.

The horror-stricken fellow dropped everything and rushed from the stable. Through the open door, however, he could see Jacob Kafer suspended from the rafters of the hay loft.

The body was speedily cut down, and as it was still warm, life could not have been extinct more than an hour or two.

Some time during the night Kafer went up into the hay loft, fastened a hitching strap about his neck, attached the other end to a cross beam and then letting himself down through the loose floor he strangled to death.

Kafer had no home but did odd jobs for farmers out there off and on for ten years past. He was a bachelor and drank to excess. He received some money from a brother in Germany some time and after spending it took his life to end the agony.

He has no relatives in this country and will have to be buried by the county.

Coroner Stellhorn held an inquest to-day and found the facts as above related.

The Reason Why

Ayer's Pills are so popular is, that while always reliable as a cathartic medicine, they never leave any ill effects. This is because they are purely vegetable, and entirely free from calomel or any other dangerous drug. In all cases, therefore, whether the patient be old or young, they may be confidently administered.

In the Southern and Western States, where derangements of the liver are so general, Ayer's Pills have proved an inestimable blessing. D. W. Baine, New Berne, N. C., writes:

"I suffered a long time with stomach and liver troubles. I tried various remedies, but received no benefit until I commenced taking Ayer's Pills. These pills benefited me at once. I took them regularly for a few months, and my health was completely restored."

Throughout New England, next to lung diseases, Stomach and Bowel Complaints are the most prevalent.

Dyspepsia

and Constipation are almost universal. Mr. Gallacher, a practical chemist, of Roxbury, Mass., who was long troubled with Dyspepsia, writes:

"A friend induced me to try Ayer's Pills, and, after taking one box without much benefit, I was disposed to quit them; but he urged perseverance, and, before I had finished the second box, I began to experience relief. I continued taking them, at intervals, until I had used eleven boxes. Suffice it to say, that I am now a well man, and grateful to your chemistry, which outstrips mine."

The head and stomach are always in sympathy; hence the cause of most of those distressing headaches, to which so many, especially women, are subject. Mrs. Harriet A. Marble, of Poughkeepsie, N. Y., writes that for years she was a martyr to headache, and never found anything to give her more than temporary relief, until she began taking Ayer's Pills, since which she has been in the enjoyment of perfect health.

It is said that 10,000 school houses have been built in Indiana, during the past twenty years.

Hon. David Turpie spoke to an audience of 6,000 people at Laporte last Saturday. The junior senator is receiving an ovation everywhere.

The New York newspapers are discussing the mayoralty, and Mr. Hewitt, the present chief magistrate, seems to have the best of the sentiment.

The theft of $100,000 worth of diamonds, at Paris, from Mrs. Parson Stevens, of New York, was not an advertisement. The thief got away with the property.

It is asserted boldly that certain gambling houses and dens of iniquity are operated under police protection. The evidence of a disgraceful deal is coming to the surface.

Mr. Richard Smith, of the Cincinnati *Commercial-Gazette*, has purchased the Toledo *Commercial*. Mr. Smith says he will make the paper first-class in every particular, publishing the full Associated Press report.

Governor Palmer is making a magnificent canvass of Illinois, but his success is hampered by the contest for control of the legislature, by ex-Congressman Morrison, who appears to be making a personal campaign.

A dozen citizens of Bloomington, Ill., testify that General Harrison did insult the Irish people in a speech at that city and now come a number of citizens who assert that he did not. The case now goes to the people for their consideration.

The New York *Herald* quotes this from the republican national platform of 1884: "The republican party pledges itself to correct the inequalities of the tariff and to reduce the surplus * * by such methods as will relieve the taxpayer without injuring the laborer, or the great productive interests of the country." But that is not half so good as the fourth plank from the republican national platform of 1868, adopted at the convention which first nominated General Grant to the presidency: "It is due to the labor of the nation that taxation should be equalized and reduced as rapidly as the national faith will permit." This states the democratic platform exactly.

The present session of congress is the longest in American history. The longest preceding session was that of 1850, the year of the Missouri compromise, which was adjourned at noon of September 30. Constructively, the session of 1868, following the impeachment proceedings against President Johnson, was longer, the adjournment sine die having taken place November 10, but as a matter of fact, congress took a six weeks' recess from July 27, and never afterward had a quorum or attempted to transact any business. The house of representatives has not had a quorum for several weeks, but such business as could be done by unanimous consent has been done, and, as one of the regular annual appropriation bills—the general deficiency—is still before the conferees of the two houses, it cannot yet be said that the year's regular work for either house is finished.

Paper is now manufactured from sea weed, according to a process recently invented in Japan. The article made in this way is said to be so strong as to be almost untearable, is sufficiently transparent to admit of its being used as window glass, and takes all colors about equally well.

WHAT THE MILLS BILL MEANS.

1. It means Cheaper Clothing. The Mills' bill takes the tax or duty off from wool, thus reducing the cost of woolen goods and enabling the workingman to buy for the same price he pays to-day clothing that will contain less shoddy and more wool.

2. It means Cheaper Food. The workingman now pays a heavy tax on every pound of salt or sugar that he uses. The Mills bill takes the duty off from salt entirely, and reduces that on sugar.

3. It means Cheaper Houses. The home of every mechanic in the land costs far more than it ought to, owing to the taxes on the materials used in its construction, levied for the sole benefit of the forest owners of Michigan and Maine and the mine owners of the western and middle states. The Mills' bill puts lumber, brick and building stone on the free list, and reduces the tax on iron, copper, lead, zinc, paint, slate, tools and other articles used in building.

4. It means Less Rent to Pay. The less the cost of building, the more houses will be built and in the market.

5. It thus means More Employment for the multitude of people engaged in or dependant on the building trades.

6. It means More Employment for those engaged in woolen manufactures. The manufacturer gets his material cheaper, can thus sell his manufactured goods cheaper without cutting wages, finds a wider market, and will thus extend his plant and business.

7. It does not mean Free Trade, but lower duties on the raw materials or manufacture and the necessaries of life.

8. It means, in short, that the democratic party has to-day, as ever, the interests of the laboring classes nearest to its heart, and is now advocating in the Mills bill a measure that will necessarily increase the welfare and prosperity of the laboring people of this country.

Dyspepsia

Makes the lives of many people miserable, and often leads to self destruction. We know of no remedy for dyspepsia more successful than Hood's Sarsaparilla. It acts gently, yet surely and efficiently, tones the stomach and other organs, removes the faint feeling, creates a good appetite, cures headache, and refreshes the burdened mind. Give Hood's Sarsaparilla a fair trial. It will do you good.

In 1810 Henry Mogel, a farmer of Center Township, Berks County, Pennsylvania, found a land turtle in one of his fields, and cut his name and the year on the under part of its shell. His son, the present Treasurer of Berks County, lives on the same farm. A few days ago he was passing through the field and he found the turtle, with the name and date plain on the shell, within a few feet of the spot where the turtle was first found, seventy-eight years ago.

TAR-OID

NATURE HAS NO BETTER REMEDY

Than this New Compound of Tar for Wounds, Burns, Sores, Piles, Salt Rheum, Eczema, and Coughs, Croup, Scrofula, Ulcers, Varicose Veins, Bronchitis, and Consumption.

TAR-OID must not be confound with the cheap remedies which are prepared on the theory that like cures like. Diseases are caused by impure blood, which is not pure. They have their seat in the blood, and cause a taint of vitiated action in the skin. TAR-OID restores the blood, hence it cures every form of skin disease, like pimples, boils, etc. It is soothing and wonderfully healing—gratifying results follow in every case. It is tasteless and can be used with perfect safety by any one. It is superior to all other remedies. There is positively nothing else like it.

TAR-OID is a sure cure for piles. It never fails. We warrant a cure or refund the money. It gives immediate relief. It is perfectly safe, yet powerful in its action.

The Snake-Charmer's Lost Charm.

India has just lost a snake-charmer, one Kondajee Mubojee, who fell a martyr to his belief in his own powers, says the London *Standard*. A lad 6 years old, named Vittoo Heorree, was bitten by a cobra at Mazagon, Bombay, and, as usual, a snake-charmer was at once sent for. Kondajee arrived at the spot in half an hour, but the boy was already dead. The snake-charmer inquired where the cobra had taken refuge, and, on a woodpile being pointed out, he removed the wood, found and seized the snake, and endeavored to make it bite the boy, declaring if it did so the child would at once be restored to life. For two hours he persevered, but the snake refused to strike the boy, and at last, irritated beyond endurance, turned and bit Kondajee in the hand.

The snake-charmer calmly placed the snake in a copper vessel and then sat down. A vehicle was sent for and the man placed inside, but by the time he reached home he was dead. The story testifies strongly to the belief of snake-charmers of India in their power over the snakes, and to the existence of a superstition that the second bite of a snake will restore the life that the first has taken away. The apathy of the Hindoo is evident by the fact that the snake-charmer used no effort whatever to save his own life. Whether he thought that he was proof against its ill-effects was not stated in the evidence given at the inquest held on the body of the child; but it is clear that he had no belief in the virtues of any antidote or mode of treatment.

It is most probable that he was confident in the powers of the drugs, ointments, or charms he had previously used to protect him, for the evidence of the spectators showed that upon finding the snake in the woodpile he had seized it without the slightest hesitation. It is certainly singular that a man accustomed to handle snakes should have been so convinced that their bite had power to restore life as well as to cause death.

Has Great Confidence in the French Count.

"An' phwere is Mary Ann now, Mrs. O'Raherty? I haven't seen her for siveral days."

"Faith an' she's gone to the waterin' place, Mrs. O'Flaherty."

"An' phwere is that?"

"Divil the bit do I know, but it's somewhere in the Aist."

"An' who did she go wid?"

"The Frinch Count, av coorse."

"Wid the Frinch Count! 'Pon me sowl, Mrs. O'Raherty, is it aindin' your only daughter to the divil that you do be allowin' her to travel through the country wid a mon widout bein' married?"

"Faith an' it's little ye know of the shtoyle of hoigh society, Mrs. O'Flaherty, or ye wouldn't be spakin' so ignorant. There isn't a more dacenter girrul in the wurruld than Mary Ann, an' the Frinch Count towld me he would watch over her loike a father, so he would."

"An' ye belave him?"

"To be sure I belave him. Mary Ann to him is the wurruld itself; an' does ye think that under sich sarcumstance he'd do anything wrong to her? He looks on Mary Ann as his own. He towld me so hisself, he did. An' look at the great ixpins he do be goin' to for her sake—drissin' her loike a quane an' givin' her all the money she can carry an' faistin' her on the best in the land. Does ye think he'd be doin' all that if he didn't look on her as his woife?"

"I don't dispute, Mrs. O'Raherty, that he looks upon her as his woife, an' that's phwat's the matter wid Mary Ann. Phwin I was young I had a illegant mon wance that looked upon me the same way, the dirty divil!"

"Well, good mornin', Mrs. O'Flaherty. It's two big washin's that I must be gittin' out to-day, an' if I niver begin I'll niver commince."—*Kentucky State Journal*

DR. R. J. GATLING, the inventor of that terrific engine of destruction known as the Gatling gun, has spent several years of study and experiment upon a new method of making heavy ordnance, and as a result has obtained patents in this country and Europe upon an invention which may revolutionize the entire system of manufacturing heavy missile projectiles now in vogue. The only plan on which these guns have ever been constructed is on the built-up method, which is the style of gun now turned out by Krupp, Armstrong and other manufacturers. Results obtained from these guns have always been unsatisfactory, the record being that nearly all of them burst sooner or later. The best gunmakers of Europe will not warrant their guns to fire more than 100 times One or two attempts have been made in this country to make solid steel guns by casting huge ingots of steel and boring them out. From a scientific standpoint there are serious objections to this method, the chances for imperfections largely predominating. Dr. Gatling's new invention is said to be the casting of the heaviest ordnance in solid steel around a central core, which is used in several ways for obviating the disadvantages of the old style guns. The result, it is claimed, will result in the production of an infinitely better gun at a reduction of 50 per cent. in cost. Operations are now under way to have two six-inch guns made for the purpose of demonstrating the practicability of Dr. Gatling's new system.

Caught.

By reason of his skillful maneuvering and great adroitness, Mr. Billing had lived to the age of 49 without becoming a benedict, but in an unguarded moment the discipline of a lifetime availed him nothing.

It was on a May morning that he strolled into a garden with Miss Tenie McGinnis, a spinster of 48. They sat down on a garden bench, and Mr. Billings unwittingly said:

"See those robins building their nest in that old apple tree."

"Oh, Mr. Billings!" but Billings, seeming to have lapsed into idiocy, rambled on:

"Don't you like to see the little birds mate?"

"Oh, Mr. Billings; how you do talk!"

"Really, Miss McGinnis, I——"

"Oh, *Mr.* Billings!"

"Why, Miss——"

"Oh, Mr. *Billings!*"

"No, but, really, Miss McGinnis, I'm in earnest; I love to——"

"Oh, you *naughty* man! And did you bring me out here to say this to me? Oh, Mr. Billings!"

"Why, I only said that I loved——"

"Oh—oh—it's all so sudden. What shall I say? I—I—suppose you'll just *make* me say yes. I—I—oh, *George*!"

"Why, I—I——"

"*My*, George!"

"Why, woman, I——"

"I suppose I could be ready in a month if you really insist on it, dear George."

"See here, Miss——"

"Hush, darling, some one is coming."

And when their host and hostess appeared Miss McGinnis blushed and said with down-cast eyes:

"We're engaged."

And Billings hadn't the nerve to deny it—so they were married. — *Detroit Free Press.*

The liver and kidneys must be kept in good condition. Hood's Sarsaparilla is a great remedy for regulating these organs.

AMONG the exhibits at a Belgian dog show is a breed of dogs, the Schipperkes, found only in Belgium. They are made use of on board the numerous inland navigation boats. They are small black dogs, without tails and with pointed ears, of extraordinary intelligence and fidelity.

"I have taken, within the past year, several bottles of Ayer's Sarsaparilla, and find it admirably adapted to the needs of an impoverished system. I am convinced that this preparation, as a blood purifier, is unequaled." C. C. Dame, Pastor Congregational church, Andover, Me.

Advice to Mothers.—Mrs. Winslow's Soothing Syrup should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to take. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels and is the best known remedy for diarrhœa, whether arising from teething or other causes. Twenty-five cents a bottle.

I have not used all of one bottle yet. I suffered from catarrh for twelve years, experiencing the nauseating dropping in the throat peculiar to that disease, and nose bleed almost daily. I tried various remedies without benefit until last April, when I saw Ely's Cream Balm advertised in the Boston *Budget*. I procured a bottle, and since the first day's use have had no more bleeding—the soreness is entirely gone.—*D. G. Davidson, with the Boston Budget, formerly with Boston Journal.*

The Newspaper Revolution.

From the Rockford (Ill.) Register.

"The era of cumbrous blanket-sheets seems coming to an end, and newspapers like the *New York Sun* and THE CHICAGO DAILY NEWS are the prominent journalistic successes of the period. The papers that give enough reading matter to fill a good volume in each daily issue are going out of favor with many people who have some other employment for their time than the search through mountains of straw for kernels of news. The sheets that give the news systematically and amply, and without unnecessary padding, are taking the lead in the great cities."

Forty years ago the chief duty of an editor, in view of his limited facilities, was to gather all the news he could and print it. Intelligence was transmitted slowly; many occurrences of interest were never heard of beyond their immediate locality; ocean mails were long in transit, and the overthrow of an European dynasty was not known here until long after the event. Suddenly there came a change. The railroad and the telegraph superseded old methods, and the newspaper was literally flooded with news. The death of a petty ward politician in San Francisco, the result of a Presidential election, the accession of a sovereign, the outbreak of a war, and notice that a shanty had been burden in Texas, all were hurried over the wires into the newspaper offices, and there being no idea of discrimination, all were printed. Thus originated the "blanket sheet." The publisher who could send out the biggest blanket for a nickel was the most enterprising; the biggest paper was the best; it was a period of bigness. But after a time the very excess of the evil brought the remedy, and there began an era of discrimination, during which arose such journals as the *New York Sun* and THE CHICAGO DAILY NEWS. That the public appreciated the new departure is best evidenced in the fact that the *Sun* reached a circulation of 150,000 a day, and THE DAILY NEWS 175,000. The wonderful and constantly growing popularity of the condensed, low-priced papers has so far brought the cumbrous and high-priced blanket-sheets to their senses, that they have now somewhat reformed both as to size and price, but they are still too far removed from the true ideal of American journalism to meet the needs of the great majority.

In the west THE CHICAGO DAILY NEWS has been the first to appreciate and meet the situation, and it now enjoys the results of its twelve years of pioneer work in a daily circulation averaging over three times that of any of its contemporaries, and considerably more than the circulations of all other Chicago dailies combined. It is hardly necessary to say that such a circulation could not be attained, much less maintained, except by a paper of high grade of excellence, as well as one sold at a popular price. To win such recognition the cheap paper must be *as good a newspaper* as the best of its higher-priced competitors. And this THE DAILY NEWS certainly is. It is a member of the Associated Press, and is the only paper in Chicago which possesses a franchise which secures to it both the day and night dispatches of the Association. In the general field of news-gathering it represents in the highest degree the progressive enterprise of American journalism: as a *news*-paper it challenges comparison with any in the land.

In its editorial columns THE DAILY NEWS speaks from the standpoint of the independent newspaper, and thereby escapes the temptation of impairing honest and honorable influence by condoning or defending the questionable under the pressure of party allegiance. It is not an organ, neither is it a neutral in questions of principle. It has the courage of its convictions. The organ of no party, sect or interest, it voices the united demand of all those better elements of society in behalf of purity, honesty and decency in all the relations of life. By just so much as it thus commends itself to the regard of the truly "best people" of the community does it voluntarily renounce any community of interest with all others.

So conspicuous a success must have its imitators, and THE DAILY NEWS has the endorsement such imitation always bestows. However as it is the only one-cent paper in Chicago or the West which is a member of the Associated Press—all other Chicago Associated Press papers cost 3 cents—all imitation must continue, so far as *news giving value* is concerned, to be but imitation. THE CHICAGO DAILY NEWS is "the original," "the best."

Sold by all newsdealers at ONE CENT per copy, six cents per week. Mailed, postage paid, for $3.00 per year, or 25 cents per month. Every farmer can now have his daily paper at little more than the cost of the old time weekly. Address

TWO FARMERS in Hunterdon County, New Jersey, who had been engaged in almost constans quarrels as to the merits of their live stock for several years, recently decided to settle disputes in a very strange way, says the New York *Clipper*. Their last controversy was as to which had the best ram. A New York lawyer who had frequently been asked to arbitrate their differences proposed that the rams be pitted one against the other, and the one that outbutted his rival should be considered the winner and its owner and his possessions be deemed the superior for a year to come. This was agreed to, together with a condition, proposed by one of the disputants, that each farmer should ride his ram during the fray. During the second round the men, as well as the sheep, commenced butting each other and kept up the strange contest until the spectators separated them to avoid serious consequences. One of the rams died from injuries received in the fight and the farmers were so used up that they did not venture from their homes for several days.

There were built at the Indianapolis car works last month 532 cars. It is the largest number ever turned out in any one month at this establishment. In addition to this the company did a good deal of repairing.

The Pennsylvania company took over fifty persons from this city to Chicago this morning. The company is selling round trip tickets to Chicago for $4.20 every Tuesday until the 16th, on account of the exposition, and a large number are availing themselves of the low rates.

Within the next thirty days there will not be a manufactory of any importance in and about Indianapolis that is not supplied with natural gas for fuel unless it be a few establishments where the work is of such a character that the waste lumber and sawdust supply all the fuel required.

The boys at the Olds wheel works tell a dog story on Frank Connors, the engineer at engine house No. 2, which is hard, even for a reporter, to believe and we consequently refrain from repeating it, but will only say that Frank thought he had killed a dog, and was surprised some time afterward to see his dogship turn up alive and as well as ever.

The new form of passenger conductors' checks adopted by the Cincinnati, Wabash and Michigan railway is attracting much attention in railway circles. There are eight different designs for the top of the check, and each one is printed in three colors, making twenty-four different kinds, or a different check for every working day in the month. If needed, there could be over one hundred different designs in one or more colors.

THE GRAND RALLY.

Preliminary Work of the Democrats to Make Judge Thurman's Reception a Great One.

At the rooms of the democratic county central committee, yesterday afternoon, was held a meeting of prominent democrats to arrange for the forthcoming grand rally, Oct. 17.

There were present, Hon. Allen Zollars, Hon. Wm. Fleming, Hon. R. C. Bell, Hon. C. A. Munson, Hon. J. M. Barrett, Hon. Mont. Hamilton, Mr. S. B. Bond, Mr. Louis Fox, Mr. J. C. Peters, Mr. P. A. Randall, Mr. A. F. Glutting, Mr. Wm. Kaough, Mr. W. W. Rockhill, Mr. Alf Irey and others.

The railroads will be asked to give excursion rates to people living within a radius of 300 miles of Fort Wayne, for it is proposed to have democratic clubs from points inside that territory. The advantage of such an influx to the city can be seen at once and, of course, it will stimulate business men to lend some assistance in making the arrangements here successful.

Hon. William Fleming, Hon. R. C. Bell and Hon. Montgomery Hamilton were appointed a committee to select speakers and besides Judge Thurman they will have such men as Speaker Carlisle, Congressman Mills, Ex-Senator Grady, of New York, Hon. John R. Fellows, Governor Isaac P. Gray, Senator David Turpie and ex-Senator McDonald and possibly others.

The following committee on advertising and railroad rates was appointed: Hon. R. C. Bell, Christ Wenninghoff, Robert Smith, Alf. Irey and A. J. Moynihan.

Hon. J. M. Barrett, Hon. C. A. Munson, Wm. Kaough and A. F. Glutting will have charge of all arrangements and the selection of places for the speakers.

Mr. W. W. Rockhill was empowered to invite all the political clubs and a reception committee will be named later.

CHEAP RAILROAD RATES.

The railroad committee got to work actively this morning and as a result of their earnest labors the following work shows for itself handsomely:

The Muncie railroad will run an excursion from Muncie and all intermediate points to Fort Wayne.

An exceedingly low rate will be fixed, certainly not more than a cent a mile and possibly much less. The rates will be announced and advertised later on.

Political clubs and citizens generally will be invited and will attend from Chicago, Cleveland, Toledo, Grand Rapids, Jackson, Alliance, Peru, Muncie, Jackson, Valparaiso and all other cities and towns on the railroad lines named.
